

LISTING OF THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (currently amended) A single-sided adhesive tape comprising:
a film substrate having first and second opposing sides; and
a pattern on said first side of said substrate, said pattern ~~said film~~ comprising adhesive and non-adhesive sections, wherein the pattern is repeated more than two times across said film substrate with a predetermined spacing therebetween; and
wherein an adhesive section on said first side is in direct contact with said second side.
2. (original) A double-sided adhesive tape comprising:
a film substrate having first and second ~~two~~ opposing sides; and
on each side, a pattern comprising adhesive and non-adhesive sections, wherein the pattern is repeated more than two times with a predetermined spacing therebetween; and
wherein an adhesive section on said first side is in direct contact with a non-adhesive section on said second side.
3. (currently amended) ~~A~~ The tape according to Claim 1 ~~or Claim 2~~, wherein the adhesive sections of the adhesive tape are narrower than the non-adhesive sections.
4. (currently amended) ~~A~~ The tape according to Claim 1 ~~or Claim 2~~, wherein the adhesive sections and non-adhesive sections are formed in a stripe, checkerboard, wave or dot pattern.
5. (currently amended) ~~A~~ The tape according to Claim 4, wherein said film substrate comprises a material selected from the group consisting of paper, cloth, synthetic plastics, gold foil, silver foil, and clear, opaque and transparent sheets.
6. (Cancelled)

7. (currently amended) ~~★ In combination, the~~ tape according to Claim 1 ~~or Claim 2~~, further comprising a dispenser containing said tape, said dispenser having an arrangement on an inside cover and at a tape outlet of said dispenser and disposed for contacting said pattern on said first side of said tape substrate, while permitting ~~which permits~~ the adhesive tape to be moved within and discharged from said dispenser without substantially adhering to said dispenser.

8. (New) The combination according to claim 7, wherein said arrangement is disposed for contacting at least one non-adhesive section on said first side, while remaining spaced away from said adhesive sections.

9. (New) The combination according to claim 8, wherein said adhesive sections are narrower than said non-adhesive sections.

10. (new) A note pad comprising at least first and second single-sided adhesive tapes, each said tape comprising:

a substrate having first and second opposing sides; and

a pattern on said first side and comprising adhesive and non-adhesive sections, wherein the pattern is repeated more than two times across said substrate with a predetermined spacing therebetween, and

wherein an adhesive section on said first side of said first tape substrate is in direct contact with said second side of said second tape substrate.

11. (new) The tape according to Claim 10, wherein the adhesive sections of the adhesive tape are narrower than the non-adhesive sections.

12. (new) The tape according to Claim 2, wherein the adhesive sections of the adhesive tape are narrower than the non-adhesive sections.

13. (new) The tape according to Claim 2, wherein the adhesive sections and non-adhesive sections are formed in a stripe, checkerboard, wave or dot pattern.

14. (new) The tape according to Claim 13, wherein said substrate comprises a material selected from the group consisting of paper, cloth, synthetic plastics, gold foil, silver foil, and clear, opaque and transparent sheets.

15. (New) The tape according to claim 2, wherein an adhesive section on said second side is in direct contact with a non-adhesive section on said first side.

16. (new) The tape according to Claim 15, wherein the adhesive sections of the adhesive tape are narrower than the non-adhesive sections.

17. (new) In combination, the tape according to Claim 2, further comprising a dispenser containing said tape, said dispenser having an arrangement on an inside cover and at a tape outlet of said dispenser and disposed for contacting said patterns on said first and second sides of said tape substrate, while permitting the adhesive tape to be moved within and discharged from said dispenser without substantially adhering to said dispenser.

18. (New) The combination according to claim 17, wherein said arrangement is disposed for contacting at least one non-adhesive section on each said side, while remaining spaced away from said adhesive sections.

19. (New) The combination according to claim 18, wherein said adhesive sections are narrower than said non-adhesive sections.

20. (new) A note pad comprising at least first and second double-sided adhesive tapes, each said tape comprising:
a substrate having first and second opposing sides; and

on each side, a pattern comprising adhesive and non-adhesive sections, wherein the pattern is repeated more than two times across said substrate with a predetermined spacing therebetween, and

wherein an adhesive section on said first side of said first tape substrate is in direct contact with a non-adhesive section on said second side of said second tape substrate.

21. (new) The tape according to Claim 20, wherein the adhesive sections of the adhesive tape are narrower than the non-adhesive sections.

22. (New) The tape according to claim 20, wherein an adhesive section on said second side is in direct contact with a non-adhesive section on said first side.

23. (new) The tape according to Claim 22, wherein the adhesive sections of the adhesive tape are narrower than the non-adhesive sections.
